GTK+ programming tutorial
GTK Programming Languages. The GTK library itself is written in the C programming language. Applications that use GTK can therefore be written in C, however there are other options. Language bindings or wrappers allow GTK applications to be written in other languages.

GTK Programming Introduction | Programmer's Notes
Each user interface created by GTK+ consists of widgets. This is implemented in C using GObject, an object-oriented framework for C. Widgets are organized in a hierachy. The window widget is the main container. The user interface is then built by adding buttons, drop-down menus, input fields, and other widgets to the window.

Getting Started with GTK+: GTK+ 3 Reference Manual
For other languages, check the main page of the GNOME Programming Guidelines. These guidelines are heavily inspired by GTK's CODING-STYLE document, the Linux Kernel's CodingStyle, and the

GNU Coding Standards. These are slight variations of each other, with particular modifications for each project's particular needs and culture, and ...
