Subtract the resistance value of your multimeter from the resistance value of your glow plug. For example, if your plug's resistance measured .9 ohms and your meter's resistance measured .2 ohms, the real reading for the plug is .7 ohms. All the glow plugs in your engine should have similar readings.

How to Test Glow Plugs (with Pictures) - wikiHow

Isuzu promotes the longevity of its 3.0-litre engines with press releases like this: "Also powering Isuzu's N Series trucks, the Euro 4 emissions-compliant version in the MU-X produces 130kW at 3600rpm and 380Nm at 1800-2800rpm and comes with a B10 rating of 500,000km, which means 90 per cent of engines are expected to reach 500,000km before ...

How Long Do Isuzu Engines Last? — Auto Expert by John ...

The heavy turbo - diesel engine sitting over the front wheels also adds to wear in these cars, and could be part of the reason for such regular maintenance. Or, it may simply be that Isuzu has made a blanket decision that all D-Maxes, regardless of driveline, have their wheel bearings repacked every 30,000km.
