### Influence of polyethylene creep behavior on wear in total ...

During the 2011 EFORT Congress in Copenhagen, many interesting topics relating to tribology in total hip arthroplasty were discussed during a special day devoted entirely to the subject. EFORT decided that, given the wide interest in these discussions, publication of the presentations would be warmly welcomed by all fellow professionals who ...

### Total Hip Arthroplasty | SpringerLink

Total hip replacement surgery, or arthroplasty, involves removing a damaged ball-and-socket hip joint and replacing it with an artificial hip joint made out of metal or durable synthetic materials.

### Hip Replacement Recovery: Timeline and Tips for Best Outcome

Purpose: Polyethylene (PE) wear remains a common reason for revision surgery following total hip arthroplasty (THA). An established treatment method is isolated liner exchange in a well-fixed acetabular cup and entails a known high risk of hip dislocation after revision surgery.

### High risk of hip dislocation following polyethylene liner ...

M REVELL, ET DAVIS, in Joint Replacement Technology, 2008. 19.4.1 Implant designs and materials. Hip resurfacing in its current incarnation of large metal-on-metal bearings, using a hybrid of uncemented acetabular cup and cemented femoral component has galvanised hip arthroplasty and implant design. Tribology is now a science taught to clinicians, and arthroplasty surgeons must be aware of the ...

### Hip Resurfacing - an overview | ScienceDirect Topics

Excessive activity or being overweight may speed up this normal wear and cause the hip replacement to loosen and become painful. Therefore, most surgeons advise against high-impact activities such as running, jogging, jumping, or other high-impact sports.

### Total Hip Replacement - OrthoInfo - AAOS

Why it's done. Conditions that can damage the hip joint, sometimes making hip replacement surgery necessary, include: Osteoarthritis. Commonly known as wear-and-tear arthritis, osteoarthritis damages the slick cartilage that covers the ends of bones and helps joints move smoothly.

**Total hip arthroplasty : wear behaviour of different ...**

INTRODUCTION. Almost a decade ago, when the authors reported the first minimum twenty year follow-up of total hip replacement in North America 48, they confirmed the findings of others that osteolysis, acetabular loosening, and polyethylene wear were the major long term problems associated with the total hip arthroplasty procedure (Figure 1).

**Clinical Biomechanics of Wear in Total Hip Arthroplasty**

In the 1960s, total hip replacement revolutionised management of elderly patients crippled with arthritis, with very good long-term results. Today, young patients present for hip-replacement surgery hoping to restore their quality of life, which typically includes physically demanding activities. Advances in bioengineering technology have driven development of hip prostheses.

**The operation of the century: total hip replacement - The ...**

A total hip replacement is a type of surgery. It replaces your hip joint with an artificial one. It is also called total hip arthroplasty. An orthopedic surgeon can do these procedures from behind the hip, to the side of the hip, or from in front of the hip.
